PROFESSIONAL SUMMARY

Engineering leader with 13+ years of experience designing and delivering enterprise-scale backend platforms across Payments, Banking, and Financial Services domains. Extensive experience building cloud-native distributed systems using Java, Spring Boot, Microservices, Kafka, Redis, and Oracle Cloud Infrastructure (OCI).

Currently working as a Technical Architecture within TCS for PayPal, leading architecture discussions, solution design, technical decision-making, and delivery planning for enterprise payment platforms. Strong experience collaborating with architects, product managers, engineering leaders, QA, DevOps, and globally distributed engineering teams to deliver scalable, resilient, and highly available systems.

Proven expertise in distributed systems, event-driven architecture, cloud migration, platform modernization, enterprise integration, API ecosystems, production engineering, and technical mentoring. Passionate about engineering excellence, system reliability, and building scalable platforms that support business growth.

CORE COMPETENCIES

- **Technical Architecture & Solution Design**
- **Engineering Leadership & Technical Mentoring**
- **Distributed Systems & Microservices**
- **Event-Driven Architecture (Kafka)**
- **Cloud-Native Applications (OCI)**
- **System Design (HLD / LLD)**
- **Enterprise Platform Engineering**
- **API Design & Integration**
- **Cross-functional Collaboration**
- **Stakeholder Management**
- **Agile Delivery & Sprint Planning**
- **Production Readiness & Operational Excellence**
- **Incident Management & Root Cause Analysis**
- **Cloud Migration & Platform Modernization**

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL
Frameworks & Backend: Spring Boot, Spring Framework, REST APIs, JPA, JDBC, J2EE
Architecture: Microservices, Distributed Systems, Event-Driven Architecture, System Design (HLD/LLD), Domain-Driven Design (DDD), Resiliency Patterns, Enterprise Integration Patterns
Cloud Platforms: Oracle Cloud Infrastructure (OCI) – extensive hands-on experience with OCI Object Storage, Autonomous Database (ATP/ADB), Vault, and cloud-native application development; AWS – working knowledge of core cloud services
Messaging & Caching: Kafka, Redis, Asynchronous Processing
Databases: Oracle DB, MySQL, MongoDB, SQL, PL/SQL

LinkedIn: http://www.linkedin.com/in/brsethi

biswa2211@gmail.com

DevOps & Tools: Git, Maven, Jenkins, CI/CD, Docker, Kubernetes, IntelliJ IDEA, Eclipse, DBeaver, SQL Developer
Developer Productivity & AI Tools: Claude AI, Cursor AI

PROFESSIONAL EXPERIENCE

TCS

Technical Architect (Client: PayPal)

Nov 2025 – Present

- Driving technical architecture for enterprise payment platform initiatives within PayPal's engineering organization, collaborating with architects, engineering managers, and product teams to deliver scalable backend solutions.
- Leading solution design discussions, architecture reviews, and technical decision-making for distributed backend services.
- Defining High-Level Designs (HLDs) and guiding implementation teams on scalable, maintainable, and resilient architectures.
- Mentoring engineers through design reviews, code reviews, and knowledge-sharing sessions while promoting engineering best practices.
- Coordinating cross-team technical dependencies and supporting successful delivery across multiple engineering teams.
- Driving platform scalability, operational excellence, production readiness, and continuous improvement initiatives.
- Developing cloud-native backend services using Java, Spring Boot, Kafka, and distributed system principles.

Oracle Financial Services Software

Lead Engineer

Jan 2017 – Nov 2025

Data Migration Framework

- Led technical implementation of cloud-native migration services supporting Oracle Banking Cloud customers.
- Designed scalable event-driven architecture using Kafka and Spring Boot to support enterprise-scale banking migrations.
- Collaborated with solution architects and product teams to define scalable cloud architecture deployed on OCI.
- Improved platform scalability, resiliency, and operational efficiency through distributed system design and asynchronous processing.
- Provided technical leadership during architecture reviews, production rollouts, and customer deployments.

Biswa Ranjan Sethi (+91) 8431476147

LinkedIn: http://www.linkedin.com/in/brsethi **biswa2211@gmail.com**

Communication Cloud Service

- Designed and delivered backend microservices supporting enterprise customer communication platforms.
- Architected Kafka-based messaging workflows and Redis caching solutions to improve scalability and throughput.
- Worked closely with global engineering teams to define technical solutions, resolve architectural challenges, and ensure successful releases.
- Supported production systems, incident resolution, and continuous platform improvements.

TrueSaaS

- Contributed to Oracle's cloud transformation initiatives by developing scalable SaaS platform capabilities.
- Participated in architecture discussions, platform modernization initiatives, and cloud migration strategies.
- Collaborated across distributed engineering teams to deliver enterprise banking solutions.

Infosys Ltd (Client: Goldman Sachs)
Senior Software Engineer
Dec 2014 – Jan 2017
Client-embedded engineering role working within Goldman Sachs enterprise environment on workflow automation and backend platform engineering initiatives.

Technology: Java, Spring, Camunda BPM, MongoDB, MySQL
Client: Goldman Sachs

- Developed workflow automation modules using Java, Spring, and Camunda BPM.
- Built backend services and provisioning workflows for enterprise data center migration operations.
- Developed Java applications integrated with MongoDB and MySQL for document-driven processing.
- Collaborated with cross-functional teams to deliver workflow automation and operational efficiency improvements.

System Consultant Information India (SCII)
Senior Software Engineer
Oct 2012 – Dec 2014
Technology: Java, J2EE, Struts 2, Hibernate, JavaScript

- Worked on testing, defect verification, and UAT for an enterprise BI platform.
- Prepared functional documentation and supported production releases.

EDUCATION

B.Tech in Electronics & Communication Engineering 2010
Biju Patnaik University of Technology (BPUT), Odisha
